

SONR™

Prevent theft with an open security ecosystem

The store-wide solution to theft

SONR™ provides retailers with a viable solution for displaying valuable items anywhere in the store without losing them to shrink. It keeps merchandise visible, accessible, and, most importantly, shoppable. Best of all, it deters theft well before criminals reach the door.

Open environment solution

The SONR™ Echo Box is an innovative control box designed specifically for SONR™. This device seamlessly mimics warning beeps and alarms emitted by the **SONR™ family of products,** providing users with a comprehensive monitoring experience. With its ability to be installed up to 200 ft. away from the main system, the Echo Box offers maximum flexibility in terms of placement and accessibility.

Multi-tier Security System
